ASHEEN SHAMSUDEEN SHAMS

Senior Full Stack / AI Engineer | .NET Core | Python | Azure | GenAI | RAG | Agentic AI
Abu Dhabi, UAE | +971 501422409 | asheenshams@gmail.com | http://www.linkedin.com/in/asheens

PROFESSIONAL SUMMARY

Senior Full Stack /AI Engineer with 10+ years of professional experience in .NET Core, Python, Angular, and microservices architecture. Proven track record in building scalable APIs, optimizing performance, and deploying cloud-native solutions on AWS and Azure. Hands-on experience in machine learning models for trade data and data-driven analytics. Currently based in Abu Dhabi.

CORE SKILLS

Backend: .NET Core, C#, Python, Node.js, Express.js
Frontend: Angular, JavaScript, TypeScript
Architecture: Microservices, REST APIs, Distributed Systems
Cloud & DevOps: Azure, AWS, Docker, CI/CD
Databases: Oracle PL/SQL, SQL Server, PostgreSQL, Prisma ORM
Authentication**:** OAuth, SSO, UAE Pass, JWT, RBAC
Testing**:** Unit Testing, Integration Testing, End-to-End Testing
Tools: Git, Jenkins, Power BI, SSRS, Crystal Reports
Machine Learning: Regression, Classification, Model Evaluation
Azure API Management, RBAC, Identity & Access Control, Agentic AI, Redis, OpenAI APIs
Data Tools: Pandas, NumPy

WORK EXPERIENCE

Full Stack Developer — Abu Dhabi, UAE
MVP Application and Game Design — June 2026 – Present

- Developed enterprise-grade full-stack applications using .NET, Node.JS, Express JS, Angular, PostgreSQL, SQL Server
- Built secure SSO authentication integrating UAE Pass, Awqaf SSO, Google OAuth, JWT, and RBAC.
- Designed and implemented Student Registration, Family Registration, Enrollment, Registration Examination and Service Management modules for government digital platforms.
- Developed secure, scalable REST APIs with comprehensive validation, Open API/Swagger documentation,
- Enhanced various applications for AWQAF - secure full-stack solutions, authentication, API integrations, and enterprise business workflows.
- Managed application deployments, production releases, environment configuration, debugging, performance optimization, and production support across Azure, IIS, and Docker environments.
- Collaborated with cross-functional teams to deliver scalable, production-ready solutions for government digital transformation initiatives.

Senior Software Developer — Abu Dhabi, UAE
Qdata Limited — Oct 2025 – Feb 2026

- Reduced application loading time by 60% by optimizing large-scale MT5 modules using Python
- Designed and developed high-performance backend services using Fast API for scalable data integration
- Built LLM-integrated services for intelligent data processing and automation
- Implemented RAG-based pipelines to retrieve and analyze insights from large-scale trade datasets
- Developed agentic workflows to automate multi-step data processing and reporting tasks
- Built and applied machine learning models on trade data for predictive analytics and decision support
- Designed scalable data pipelines and preprocessing workflows for large datasets
- Processed and analyzed large datasets to generate data-driven insights
- Enhanced audit systems and implemented automated reporting pipelines
- Provided production support, issue resolution, and root cause analysis for enterprise applications

Senior Full Stack Developer — Abu Dhabi UAE
Enterprise Systems Analysis Technology [ESAT] — Jul 2024 -Sep 2025

- Accomplished 20% decrease in loading time by optimizing large-scale ERP modules using C# and AngularJS (legacy) + Angular.
- Delivered 100% on-time project rollouts by managing end-to-end Full Stack Development lifecycle.
- Designed and optimized scalable APIs and backend services supporting high-volume transactional systems
- Enhanced client database management by 30% through efficient SQL scripting and executed custom reports.
- Effectively engaged with stakeholders, improving product requirement clarity.
- Created responsive UI designs, resulting in a 15% increase in user engagement.
- Implemented REST APIs integration, streamlining data exchange.
- Improved ERP performance by deploying solutions on Oracle Cloud.
- Developed backend services and business logic using .NET Core and Oracle PL/SQL.
- Optimized database procedures and complex queries for high-volume transactional systems.
- Ensured security, scalability, and maintainability of backend services.

Senior Software Engineer & Tech Lead Abu Dhabi UAE
Smart Software Systems and Solutions May 2022 -Jun 2024

- Improved process efficiency by 25% by introducing automation in HR and Payroll modules utilizing ASP.NET MVC and C#.
- Successfully integrated biometric solutions, enhancing attendance monitoring by 40%.
- Developed robust asset management systems, reducing tracking errors by 35%.
- Facilitated an improved development lifecycle through Agile practices.
- Architected scalable solutions with HTML, SQL Server, and CSS.
- Enhanced system security by implementing strategies based on stakeholder feedback.
- Regularly updated system documentation, maintaining 95% accuracy in client records.
- Enhanced employee profile creation by integrating Emirates ID, streamlining data accuracy and compliance.
- Simplified the interview and onboarding process through automated employee record management.
- Improved overall employee profile handling by consolidating attendance, payroll, and loan modules into a unified system.

Senior Software Engineer Kerala, India
Simplogics Solutions Jan 2021-Jun 2022

- Developed scalable .NET Core Web APIs for Inventory Management and POS systems.
- Migrated SQL Server stored procedures/functions and reporting to PostgreSQL and SSRS, improving maintainability and performance.
- Modernized legacy POS and Inventory systems, improving scalability, stability, and data synchronization.
- Implemented microservices using Azure Service Fabric for high availability and scalable system orchestration.
- Delivered SSRS reports and data analytics, reducing manual report generation by 50% and supporting data-driven decisions.

Software Engineer Kerala, India
ARS T&TT Nov 2019 - Dec 2020

- Delivered a municipal parking permit solution, improving system reliability by 25%.
- Developed .NET Core microservices and REST APIs for document management and system integration.
- Built and deployed a full-featured E-CRM with customer registration, ticketing, and AMC reminders.
- Integrated Power BI dashboards for real-time business insights and reporting.
- Improved customer issue resolution time by 60% through the CRM ticketing system.
- Deployed applications on Linux servers, ensuring reliable and secure production operations.

.NET Developer Kerala, India
Ironns Technologies Pvt Ltd Jul 2016 - Oct 2019

- Developed ASP.NET MVC applications using C#, .NET and SQL Server.
- Developed and enhanced websites, Job Portal, Hospital Management and E-CRM applications.
- Implemented business features, database solutions, debugging, testing and performance improvements.
- Managed end-to-end SDLC, from requirements and development to deployment and production support.

Earlier IT Experience
Cicadosoft Technologies - Trainee | Jan 2014 – Apr 2014
Wintech Infoway - Software Test Engineer | Jun 2010 – Nov 2010

EDUCATION

Master of Computer Applications I University of Kerala I 2014
Bachelor of Computer Application I Mahatma Gandhi University I 2010

CERTIFICATIONS

- Atlassian Agile Project Management Professional Certificate
- SQL Advanced Certification I Hackerrank.com
- Oracle Cloud Infrastructure Foundations Certificate
- Project Management Professional Certification I Udemy.com
- Anaconda Python for Data Science Professional Certificate

PERSONAL DETAILS

- Date of Birth: 31/ 05/1989
- Nationality: Indian
- Marital Status: Married
- Notice Period: 60 Days (Abu Dhabi, UAE)
- Driving License: Valid UAE License
